

We specialise in professional extensions for the [Joomla!®\\*\\* Content Management System](#) . We have a variety of professional components, modules and plugins, also some products available for free download. These are simplified versions of the commercial products, but fully working. All our extensions are open-source.

Our customers include professional web designers and developers creating websites for their clients, as well as webmasters and website owners looking for well-designed extensions that will add something extra to their site.

## About Our Joomla!®\*\* Extensions

### [Virtuemart Featured Product Grid](#)

This is an alternative to the Virtuemart featured products module. It allows you to display featured products in a grid gallery, with the scrolling display of additional images for the product.

### [Amazon Web Services Content Plugin](#)

This plugin allows you to embed product information and a buy now link from Amazon directly into your Joomla!® article. The plugin can search Amazon using keywords related to your articles, to find the most suitable product. Your Amazon associates id can be embedded into the links, giving you a great way to monetize your Joomla!® articles.

[Virtuemart special product image gallery](#) . This component displays selected images for your Virtuemart Products as an image gallery - great for stores selling products with a strong visual

element such as artwork and photography. This extension has been substantially updated recently, and now includes an HTML/javascript layout with image lightbox, as well as a Flash gallery. It now includes a content plugin, allowing you to embed a gallery of Virtuemart images directly into a Joomla! article.

[Com jigsaw](#) , is a Flash puzzle game component. It displays your images in a selected folder as a jigsaw puzzle. Great for websites aimed at children, but also surprisingly popular with adults too.

### [Random MP3 Pro](#)

An MP3 player module that plays a random selection of mp3s from a specified folder. This popular module has often been used to simulate online radio. The player can also be used as a content plugin, allowing it to be embedded directly into Joomla!® content articles - great for podcasting and similar applications.

### [Featured Items Pro](#)

Featured Items Pro is a highly versatile articles module for Joomla!® 1.5 that allows you to feature excerpts from your choice of articles, displayed using a variety of layouts.

### [Featured Items Carousel](#)

Featured Items Carousel is a similar type of module, also for Joomla!® 1.5, but it displays the articles or thumbnails as a carousel. It not only looks really cool, but is a great space-saver.

### [Mod Mail This Page](#)

This allows a site visitor to mail the URL of the current page to a friend - a great viral marketing tool.

### [Mod Transitions](#)

This module applies Internet Explorer page transitions to any or all pages of your Joomla site.
