

The latest release of our [Amazon Web Services content plugin](#) for Joomla 1.5 and 1.6, and for Mighty Extensions Resources, is version 2.4.0.

This release includes several improvements:-

- It adds support for display of multiple Amazon products
- For improved ease of use the embedding code is now case insensitive
- Improved button graphics

Existing customers who have purchased the plugin in the past year can now download and install the new version using their current download links.

For the further convenience of our customers we are now publishing version information for our products. As this is a new feature it will take some time to include all the products, but you can view this information here: <http://www.spiralscripts.co.uk/Table/Versions/> and there is also an RSS feed available here: <http://www.spiralscripts.co.uk/Table/Versions/feed/rss.html>.
