New Featured items Module for SOBI2

Saturday, 21 November 2009 11:30 - Last Updated Saturday, 21 November 2009 11:48

We have released a new featured items module for the SOBI2 online business index.

This versatile module displays entries from the SOBI2 index in a variety of formats, including accordion, tab pane, and thumbnails only. Items can be selected in a variety of ways: selected from categories, or listed individually. A variety of orderings are available, including alphabetical, recently modified, most hits, and random.
