

We are happy to announce the launch of our newest extension for Joomla 1.5x, [VM ModController Pro](#)

One of the frustrating things about using Virtuemart is that it is not possible to assign modules to Virtuemart pages through the Joomla menu system. This module gives you the control that you need over the display of any Joomla module on Virtuemart pages.

It allows you to assign modules to Virtuemart pages (including specific flypages or browse pages), categories, and shopper groups. For example, if you just want to show a module on the checkout page, or the main category browse pages, or even to a particular shopper group, this module allows you to do this.
