

******* Now compatible with Joomla 1.5 and 1.6 *******

A module extension for the the Joomla 1.5 + 1.6 CMS. It plays a random list of flvs video files using the Flash media player.

You can change the folder used for the flvss by changing the module parameters in the module manager, also you can choose the number of videos selected - the default is 5.

There are four skin variations used: white, silver, black and blue.
